MONDAY

WEEK 20

Boating accidents are the greatest cause of death for manatees. Today, a manatee is a mammal so it must come to the surface to breath air. This means that every five to six minutes the manatee is in danger of being caught in speedboats propellers. Most adult manatees have scars from propellers? human pollution is a threat to manatees, too. Due to this pollution, a deadly plant Red Tide has flourished in the gulf of mexico many manatees have died because of this plant

TUESDAY

WEEK 20

Name \_\_\_\_\_

Manatee mothers give birth to one baby every two to five years but sometimes like humans a manatee can have twins. A mother manatee must help her calf learn how to breath so at first she may keep her calf near the surface of the water. Calves stay with their mother's for one to two years during this time, they learn where to find food and where to migrate when a baby manatee is born it weighs 34 to 43 kilos (75 to 95 lbs) It reaches 453 to 544 kilos (1,000 to 1,200 lbs). in just for to five years.

WEDNESDAY

WEEK 20

manatees need about 150 pounds of food each day their diet consists of water plants? Genuine gentle giants, manatees do not have the same advantages as many other creatures of the sea. They arent fast and they dont have sharp teeth some people are working hard to help the manatees speed limits have been set so manatees can get away from speedboats. In some waterways, speedboat's have only limited access with help from humans the manatee mite live another 60 million years
